

# Flu-O TV WEB

**Flu-O Tv** that integrates playout and graphics generator functions into one program.

It's works with the schedule created by **Philo** through the manual playlist, or by manual entry made directly from the control station.

The operator always has all the elements and instruments created and sets in **Philo** to attend quickly and accurately on the broadcast.

You can reload a schedule, load another playlist, check live events, manage graphics in real time, interact with the channel's website through the interchange of data in real time in a standard format xml.

**Flu-O Tv** stores at different level of logging, so you can use it to control the transmission and generation of reports required by law.

**Flu-O Tv** allowe the issue of advertising.

**Flu-O Tv** keeps updated in real time the marking of the clips already scheduled, performs the reconciliation of transmissions.
